

Mentor–Mentee system

The Mentor–Mentee system in higher education is encouraged under student support mechanisms of the University Grants Commission to strengthen student guidance, well-being, and academic progression. It is commonly implemented as part of institutional quality initiatives and is often documented during accreditation by National Assessment and Accreditation Council under Criterion V – Student Support and Progression.

Rationale of Mentor–Mentee System (as per UGC-oriented practices)

1. Personalized Academic Guidance

The mentor–mentee system ensures individual academic support for students. Faculty mentors guide students in:

- * Course selection
- * Academic planning
- * Exam preparation strategies
- * Career pathways

2. Early Identification of Student Problems

Through regular interaction, mentors can identify:

- * Learning difficulties
- * Attendance issues
- * Psychological or emotional stress
- * Financial or family-related problems

This helps institutions intervene before problems become serious.

3. Holistic Student Development

The system promotes development beyond academics, including:

- * Personality development
- * Leadership skills
- * Ethical values
- * Social responsibility

4. Improved Student Retention and Success

Mentoring increases student engagement with the institution, reducing dropout rates and improving:

[Handwritten signatures and initials]

- * Academic performance
- * Graduation rates
- * Career readiness

5. Strengthening Teacher–Student Relationship

A structured mentoring system creates a supportive academic environment, encouraging open communication between faculty and students.

6. Career and Professional Guidance

Mentors help students with:

- * Higher education opportunities
- * Competitive exam preparation
- * Internship and skill development guidance

7. Support for Student Well-being

Mentors can guide students toward institutional support services such as:

- * Counselling
- * Scholarship schemes
- * Skill training programs
